¹Always use safety belts and the correct child restraints for your child's age and size. Even in vehicles equipped with air bags, children are safer when properly secured in a rear seat in an appropriate infant, child or booster seat. Never place a rear-facing infant seat in the front seat of any vehicle equipped with an active frontal air bag. See the **Owner's Manual** for more safety information. ²When properly equipped; includes weight of vehicle, passenger, cargo and equipment.

³Maximum trailer weight ratings are calculated assuming a base vehicle, except for any options necessary to achieve the rating, plus driver. The weight of other optional equipment, passengers and cargo will reduce the maximum trailer weight your vehicle can tow. See your GMC dealer for additional details. See the **GMC Trailering Guide** for further details.
