

HUMMER EV SUV

FEATURES, SPECS AND OPTIONS

We have tried to make this guide comprehensive and factual. We reserve the right, however, to make changes at any time, without notice, in prices, colors, materials, equipment, specifications, models and availability. Specifications, dimensions, measurements, ratings and other numbers in this guide and other printed materials provided at the dealership or affixed to vehicles are approximations based on design and engineering drawings, prototypes and laboratory tests. Your vehicle may differ due to variations in manufacture and equipment. Since some information may have been updated since the time of publication, please check with your GMC dealer for complete details.

TRAILERING HIGHLIGHTS

PROGRADE TRAILERING SYSTEM

GMC HUMMER EV SUV's ProGrade Trailering System includes advanced technologies for increased views and confidence. It helps when hooking up your trailer, while on the road and when backing your trailer into place.

IN-VEHICLE TRAILERING APP¹

The available in-vehicle Trailering App¹ is integrated into HUMMER EV SUV's infotainment system² and includes trailering information and the ability to create five defined trailer profiles based on trailer specifications. There are also maintenance reminders, predeparture checklists, a Trailer Light Sequence Test, a Trailer Tire Pressure Monitoring System³ and other features.

myGMC MOBILE APP⁴

The available myGMC Mobile App⁴ allows you to create and manage trailer profiles, run Trailer Light Sequence Tests to help ensure trailer lights are in working order, reference predeparture checklists and use a Trailer Load Calculator to determine the combined weight of your vehicle and trailer. You can view and receive alerts on key components of your trailer such as tire pressure monitoring³ and trailer miles. There's also a glossary filled with trailering-related materials.

SMART TRAILER INTEGRATION

The available ASA Electronics iN•Command[®] Control System⁵ is designed to integrate with and be accessible through the myGMC Mobile App⁴ (on compatible iPhones[®] and Android smartphones) or on the infotainment system via Apple CarPlay^{®6} and Android Auto⁷ compatibility. The iN•Command Control System allows you to monitor and control a range of smart system functions such as water tank levels, climate controls and power slide-outs in recreational trailers equipped with GlobalConnect technology.

¹App functionality and features vary with vehicle equipment and trim level. Data connection may be required. Some features require active service plan and working electrical system. Terms and limitations apply. ²Functionality varies by model. Full functionality requires compatible Bluetooth and smartphone, and USB connectivity for some devices. ³Requires available Trailer Tire Pressure Monitoring System and installation of trailer tire pressure monitor sensors. ⁴Available on select Apple[®] and Android[™] devices. Service availability, features and functionality vary by vehicle, device and the plan you are enrolled in. Terms apply. Device data connection required. See onstar.com for details and limitations. ⁵iN•Command is provided by ASA Electronics and is designed to operate within 30 feet of the trailer. Works with trailers equipped with iN•Command Control System with GlobalConnect via Bluetooth connection. Control and monitoring functionality varies by trailer manufacturer model and installed options. Use of the iN•Command Control System feature through the myGMC Mobile App requires an active service plan. User terms apply. See onstar.com for details and limitations. ⁶Vehicle user interface is a product of Apple[®] and its terms and privacy statements apply. Requires compatible iPhone[®] and data plan rates apply. Apple CarPlay, Siri, iPhone and Apple Music are trademarks of Apple, Inc., registered in the U.S. and other countries. ⁷To wirelessly use Android Auto on your car display, you need a compatible Android smartphone with an active data plan. You can check which smartphones are compatible at g.co/androidauto/requirements. Android and Android Auto are trademarks of Google LLC.

myGMC MOBILE APP

INNOVATIVE WAYS TO TAKE CONTROL

The available myGMC Mobile App¹ elevates your ownership experience in many ways. It's also a powerful and useful tool when it comes to trailering.

IN A PROPERLY EQUIPPED VEHICLE, YOU'LL HAVE THESE USEFUL FUNCTIONS AT YOUR FINGERTIPS:

- TRAILER LIGHT SEQUENCE TESTING
- LOAD CALCULATOR
- PREDEPARTURE CHECKLISTS
- PROFILE SHARING
- GLOSSARY OF TERMS
- TRAILER TIRE PRESSURE ALERTS²
- MAINTENANCE REMINDERS
- SMART TRAILER CONTROLS

SMART TRAILER INTEGRATION

PUTTING YOU IN COMMAND LIKE NEVER BEFORE

The available Smart Trailer Control System effectively turns your smartphone into a remote control. Accessible through the myGMC Mobile App¹ (on compatible iOS and Android smartphones) or through the infotainment system (via Apple CarPlay^{®3} and Android Auto⁴ compatibility), the Smart Trailer Control System allows you to control many of your compatibly equipped iN•Command Control System⁵ trailer functions through a Bluetooth⁶ connection. It's a seamless way to stay informed and in command.

TAKE CONTROL OF THE FOLLOWING FUNCTIONS AND SYSTEMS IN YOUR COMPATIBLE ATTACHED TRAILER:

- ADJUST CLIMATE CONTROLS
- TURN THE WATER PUMP ON/OFF
- TURN THE HEATER ON/OFF
- TURN INTERIOR LIGHTS ON/OFF
- TURN EXTERIOR LIGHTS ON/OFF
- CHECK REAL-TIME STATUS OF THE WATER TANK LEVEL
- CHECK REAL-TIME STATUS OF THE BATTERY LIFE
- CHECK FUEL LEVEL OF THE GENERATOR
- PRIME AND START THE GENERATOR
- OPEN AND CLOSE SLIDE-OUTS (VEHICLE AND TRAILER MUST BE PARKED)
- OPEN AND CLOSE AWNINGS (VEHICLE AND TRAILER MUST BE PARKED)
- ADJUST JACKS (VEHICLE AND TRAILER MUST BE PARKED)

¹Available on select Apple® and Android devices. Service availability, features and functionality vary by vehicle, device and the plan you are enrolled in. Terms apply. Device data connection required. See onstar.com for details and limitations. ²Requires available Trailer Tire Pressure Monitoring System and installation of trailer tire pressure monitor sensors. ³Vehicle user interface is a product of Apple® and its terms and privacy statements apply. Requires compatible iPhone® and data plan rates apply. Apple CarPlay, Siri, iPhone and Apple Music are trademarks of Apple, Inc., registered in the U.S. and other countries. ⁴To wirelessly use Android Auto on your car display, you need a compatible Android smartphone with an active data plan. You can check which smartphones are compatible at g.co/androidauto/requirements. Android and Android Auto are trademarks of Google LLC. ⁵iN•Command is provided by ASA Electronics and is designed to operate within 30 feet of the trailer. Works with trailers equipped with iN•Command Control System with GlobalConnect via Bluetooth connection. Control and monitoring functionality varies by trailer manufacturer model and installed options. Use of the iN•Command Control System feature through the myGMC Mobile App requires an active service plan. User terms apply. See onstar.com for details and limitations. ⁶Go to my.gmc.com/learnabout/bluetooth to find out which phones are compatible with the vehicle. Full Bluetooth feature functionality varies by device, model and software version.

¹Safety or driver-assistance features are no substitute for the driver's responsibility to operate the vehicle in a safe manner. Read the vehicle Owner's Manual for important feature limitations and information. Some camera views require available accessory camera and installation. Not compatible with all trailers. See your dealer for details.

HUMMER EV SUV CAMERA-VIEW COMPATIBILITY

CAMERA-VIEW COMPATIBILITY		
ALL TRAILERS MAY NOT BE COMPATIBLE. THIS CHART IS FOR REFERENCE ONLY.		
CAMERA VIEW	TRAILER TYPE	DIMENSIONS REQUIRED
Rear Trailer View With Trailer Angle Indicator ¹	Box/Enclosed ²	Yes
Rear Trailer View ¹	Most	N/A
Rear Side View	Most	N/A
Rear Side View With Trailer Biasing	Box/Enclosed ²	Yes
Rear Side View With Trailer Length Indicator (Turn-Signal-Activated)	Box/Enclosed ²	Yes
Transparent Trailer View ³	Box/Enclosed ²	Yes
Jack-Knife Alert	Box/Enclosed ²	Yes
Picture-in-Picture Side View ¹	Most	N/A
Inside Trailer View ¹	Most	N/A
Hitch View	Most	N/A

Safety or driver-assistance features are no substitute for the driver’s responsibility to operate the vehicle in a safe manner. The driver should remain attentive to traffic, surroundings and road conditions at all times. Visibility, weather and road conditions may affect feature performance. Read the vehicle Owner’s Manual for more important feature limitations and information.

¹Requires available accessory camera and installation. Not compatible with all trailers. See your dealer for details. ²Box/enclosed trailer is a type of trailer that has walls and a roof to completely enclose cargo and keep it protected from the elements. ³Requires available accessory camera and installation. Not compatible with all trailers. See your dealer for details. This camera view has a trailer-length limitation of 32 feet.

CALIBRATION TIPS FOR TRANSPARENT TRAILER VIEW

FOLLOW THESE CALIBRATION TIPS FOR SUCCESSFUL SETUP:	
Drive below 31 mph	Driving faster may delay calibration.
Drive straight	Excessive steering may extend calibration time.
Use good light	Calibration should be attempted when there is enough light.
Set up in good weather	Calibration during snow or heavy rain should be avoided.
Use a flat, defined road	Avoid gravel, dirt or unmarked roads.
Use the proper connection	Ensure that the camera is connected to the correct input.
Use the correct location	The accessory camera should be mounted and angled inside the defined mounting location (see camera installation instructions).
Check for a clean lens	Cameras obstructed by dirt or debris may hinder calibration.
Check for a clear view	The accessory trailer camera should have an unobstructed view (no spare tire, bike/cargo racks, etc.). Shadows may be perceived as obstructions. Attempt to calibrate while driving in an alternate direction if possible.
Ensure dimensions are correct	Enter accurate measurements made to the nearest inch.
Measure correctly	Use the width of the box of the trailer. Do not include the width of the wheels. This helps transparent trailer view and Jack-Knife Alert to work accurately.
Measure V-nose trailers correctly	For V-nose trailers, when measuring the distance between the ball and the front of the trailer, you should measure the distance to the widest part of the trailer, not to the point on the nose.

Safety or driver-assistance features are no substitute for the driver’s responsibility to operate the vehicle in a safe manner. The driver should remain attentive to traffic, surroundings and road conditions at all times. Visibility, weather and road conditions may affect feature performance. Read the vehicle Owner’s Manual for more important feature limitations and information.

Transparent trailer view requires available accessory camera and installation. Requires compatible conventional trailer. Not compatible with all trailers. See your dealer for details. This camera view has a trailer-length limitation of 32 feet.

See your dealer for details.

TRAILER HITCH TYPES

SELECTING THE RIGHT HITCH

Choosing the right hitch, while ensuring proper electrical connections are made, affects how your vehicle handles, corners and brakes, and allows you to alert other drivers of your intentions. Before selecting a hitch or trailering package, you should be familiar with the weight ratings specific to your GMC vehicle.

CONVENTIONAL TRAILER HITCH

HUMMER EV SUV is equipped with a trailer hitch receiver that, when properly equipped, will enable towing of conventional trailers. This style of trailer is typically used to describe recreational trailers, such as campers or boat trailers. Conventional trailers generally utilize a ball-type hitch.

CONVENTIONAL TRAILER HITCH

HITCH BALL ON DRAW BAR

WEIGHT-DISTRIBUTING HITCH

WEIGHT-CARRYING HITCH

This consists of a hitch ball mounted on a step bumper or draw bar, or a tow eye latched to a pintle hook. Hitch balls are available in a range of sizes. Make sure that the diameter of your hitch ball matches your trailer coupler. Also check that the ball and ball mount meet or exceed the Gross Trailer Weight Rating.

WEIGHT-DISTRIBUTING HITCH

This is most often used for heavier trailering. This hitch type more evenly distributes the trailer load by using spring bars to shift some of the hitch weight forward onto the tow vehicle's front axle and rearward to the trailer's axles.
